

## HOW TO USE THE CADDY & LINERS

**1** Line kitchen caddy with Council approved compostable liner.

**2** Place food scraps in your lined kitchen caddy.

**3** Place filled liner into your green lidded organics bin.

### CADDY LINERS

A years supply of compostable liners will be delivered to you every year.

In the meantime if you run out:

- line your kitchen caddy with paper towel or newspaper,
- place the organic material straight into the organics bin,
- visit your local council for additional liners

## WHEELIE BIN TIPS

### 1 LABEL YOUR BINS

Put your number on your bin, especially if you are in a unit complex.

### 2 TIMING

Put your bins at the kerbside for collection the night before or **by 6am** on the morning of collection.

### 3 NOT TOO CLOSE

Place your bins away from overhanging trees, as these get in the way of the truck.

### 4 DON'T OVERFILL

The bin lid must be closed for collection. The truck's mechanical arm cannot lift overfilled bins. Extra items placed on top or next to the bin will not be collected.

### 5 BIN PLACEMENT

Close to kerb - at least 1 metre apart and away from trees, cars, and other obstructions. Wheels towards the property.

### 6 CONTAMINATION

**X** The wrong items placed in bins could contaminate whole truck loads of material collected for recycling or green waste. This could result in the whole truck being sent to landfill. If contamination is on-going, Cleanaway will have no option but to withdraw your service.

**Green lidded** organics bin will be collected every week.

**Red lidded** general waste bin will be collected fortnightly.

**Yellow lidded** recycling bin will be collected fortnightly.

In other words, your green lidded bin will be collected every week along with EITHER your red or yellow lidded bin.
