SAVE POWER KIT

Learn how you can save power, minimise water usage, reduce emissions, and create a more sustainable future in your own home

THE KIT CONTAINS:

- **Power-Mate Lite** – measure the power consumption of appliances and estimate running costs
- **Infrared Thermometer** – measure surface temperatures to work out where hot & cold air is entering your home
- **Thermometer** – measure air temperatures around your home and work out how to keep fridges and freezers at their optimal temperature
- **Light Meter** – measure light intensity around your home to determine light levels
- **Stopwatch Timer** – cut down shower times and reduce the amount of hot water used
